Total	\$9,436.00	\$17,163.99	\$7,727.99	45%

The above spreadsheet compares **just a few** OETC prices on popular products with those of **educational resellers**. All volume licensing options have been exercised for a fair comparison between OETC and "street" pricing. These prices are effective for October 2003. This chart is intended for informational purposes only and is not an official price quote. Most software products sold by the OETC are sold a la carte, allowing schools to achieve even greater savings by purchasing a single CD and multiple licenses. For more information about the OETC, please visit our website at www.oetc.org
